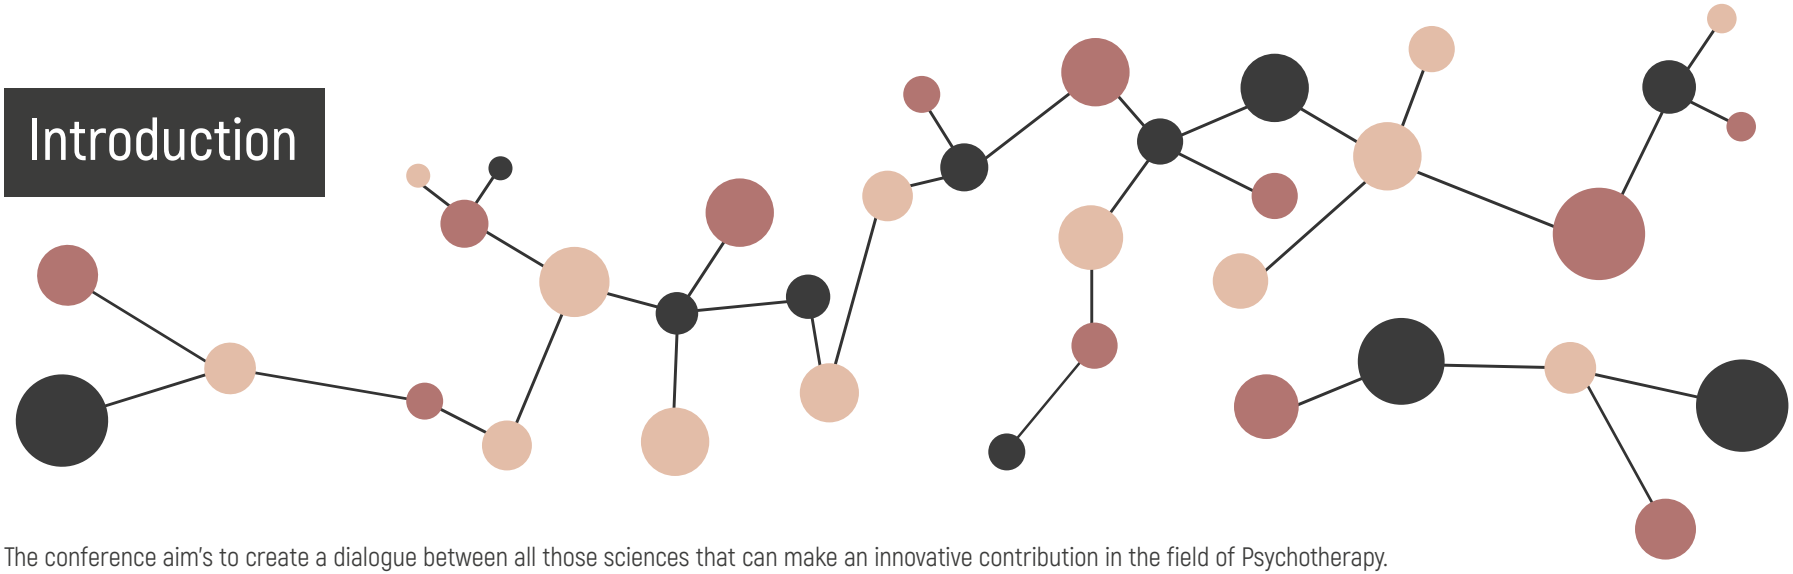
Ist International Conference

Therapeutic Diagnosis

Digital Humanities and Neuroscience in Psychotherapy

Florence, 1st-2nd March 2019

Introduction



The conference aim's to create a dialogue between all those sciences that can make an innovative contribution in the field of Psychotherapy.

More international research expresses how the current interventions are still partially effective in interacting with implicit dimension of consciousness. Searching for new operational tracks becomes a priority.
In this perspective, we improve every theory and / or research that can demonstrate a true integration between psychotherapeutic models, medical devices and neurosciences.

With this aim, international experts in the fields of Neuroscience, Digital Humanities and Psychotherapy will make their contributions to lay the foundations for a first multidisciplinary work group in Italy.

The conference is aimed at **Psychologists**, **Psychotherapists**, **Physicians**, **Neuroscientists**, **Biomedical Engineers**, **Psychiatric Rehabilitation Therapists** and **other Professionals** in the sector.

Members will have the opportunity to participate actively in the program through the presentation of scientific contributions.

The international commission will define a ranking and a cash award to the first three jobs that will stand out for scientific innovation.

Call for Abstract

The members of the Conference have the opportunity to be present to the program by submittingscientific contributions.

Instructions

The Abstract must reach the Organizing Secretariat by and no later than **December 31th 2018** to: **convegno@anses.it** (object: SURNAME ABSTRACT FIRENZE 2018) in pdf format.
All the presented works will be submitted to the ANSES Scientific Committee evaluation.
The best contributions will be selected in terms of originality and quality of the proposed topic.

The works must notexceed 3500 characters (excludingbibliography) and it must be indicated:
- Title
- Author's name and surname, Institute/Department/College; main author' address (email, telephone number)
- Thematic area:
  - Neuroscience
  - Digital Humanities
  - Psychotherapy
- Aims
- Methodology
- Maincontents
- Existing literature and specific contribution of the presented work
- Results
- Conclusions

The author will have 10 minutes for the presentation.
Each author can present only one abstract even if he can participate, as a co-author, in several works.
The Organizing Secretariat will notify the author's email address of the acceptance or refusal of the scientific contribution sent by June 30th 2018.

Registration of the authors

The authors of oral communications must be regularly registered at the Congress. The registration of the principal author must be contextual to the sending of his/her job.
For further information, please contact the Organizing Secretariat at **convegno@anses.it**.

Rapporteurs

Friday 1st March	9.30-13.00 14.30-17.00
Saturday 2nd March	9.30-13.00 14.00-15.30

E. Dyson: "Neuroscience and Digital Humanities: the state of the art"
M. Martone: ""Neuroinformatics and Neuroscience"
A. Peled: "Computational Psychiatry Digital Mental Health and the future"
R. Gradini: ""Neurobiology of emotions"
S. Ulivi: "Neuroimmunomodulation and Psychotherapy"
A. Pagnini: "Philosophy, Neuroscience and Digital Humanities"
M. Mazzolai: "Communication through Digital Humanities"
G. Cozzolino: ""Epigenetics and Neuroimmunomodulation"
N. M. Maldonato: "When we decide. Are we conscious actors or biological machines?"
E. Sermoneta: ""Informational Medicine. Diagnosis and Therapy"
C. Fé d'Ostiani: "Neuroinformatics and Modulation of the Autonomous Nervous System: use in Therapy"
C. Cappellini: "Utilizzo di possibilità terapeutiche combinate per il Bendessere personale e relazionale"
S. Peele: "The NeuroMyth of Addiction: Addiction as Lived Human Experience".

Moderators

Anna Maria Venere, **Antonella Gramigna**, **Claudia Bonari**, **Maria Di Bello**

Main Speakers

Esther Dyson

New York Times journalist–Philosopher, Emerging Digital Technologies and Neurosciences' Expert – Philanthropist

Abraham Avi Peled

Professor of Psychiatry, MentalHealth Center Shaar-Menashe, Israel - Senior Lecturer, Bruce and Ruth Rapaport, Faculty of Medicine - IsraelInstitute of Technology, Haifa, Israel - Cofounder of Neuroanalysis.org

Maryann E. Martone

Emeritus Professor, Neuroscience Dep., UC San Diego School of Medicine – Neuroanatomist and Neuroinformatics' expert - Hypotesis.is Director of Biosciences (California)

Roberto Gradini

Medical Pathology Associate Professor, Director of the Master in Psychoneurobiologyat Sapienza University (Rome, Italy)

Sabrina Ulivi

ANSES President– Integrative Psychotherapy and Neuroimmunomodulation– University of Siena

Stanton Peele

Psychologist, Psychotherapist - New York, USA

Faculty

Nelson Mauro Maldonato

Professor of Neurosciences' Department, Federico II University of Naples

Alessandro Pagnini

Associate Professor of History of Contemporary Philosophy, Firenze University

Elio Sermoneta

Kinesiology Homeopathy Surgeon specialized in Natural Medicines, Milan

Carlo Cappellini

Adviser and Press Officer of SNAMID Board, Milan. National Provider AGENAS. Component Unconventional Medicine OMCeO, Milan

Mauro Mazzolai

Doctor in General Medicine, Pulmonologist, Homeopath, Biological Aesthetic Medicine, Communication Sciences, Grosseto

Cristiana Fe d'Ostiani

Medical Psychotherapist, Florence

Giovanni Cozzolino

Sociologist, Epigenetic Expert, Pistoia

Entrance fee

Within 31/12/18	After 31/12/18	University students	
		Within 31/12/18	After 31/12/18
280€	320€	150€	180€

Organizational Secretary / ECM Provider
